2015-07-07 00:02:07	New Horizons is taking images of Pluto with LORRI 4x4 from 8723234.4 km away at est. resolution 170 km/pix. New Horizons is 31.8 AU from Earth.
2015-07-07 00:03:36	New Horizons is taking images of Pluto with LORRI 4x4 from 8722007.1 km away at est. resolution 170 km/pix.
2015-07-07 00:05:52	New Horizons is taking images of Pluto with LORRI 4x4 from 8720131.8 km away at est. resolution 170 km/pix. New Horizons is 31.8 AU from Earth.
2015-07-07 00:07:21	New Horizons is taking images of Pluto with LORRI 4x4 from 8718904.6 km away at est. resolution 170 km/pix.
2015-07-07 00:09:37	New Horizons is taking images of Pluto with LORRI 4x4 from 8717029.3 km away at est. resolution 170 km/pix. New Horizons is 31.8 AU from Earth.
2015-07-07 00:10:00	New Horizons' track ending with Madrid 70 m (DSS-63)
2015-07-07 00:11:06	New Horizons is taking images of Pluto with LORRI 4x4 from 8715802.0 km away at est. resolution 170 km/pix.
2015-07-07 00:11:00	New Horizons is taking images of Pluto with LORRI 4x4 from 8713926.7 km away at est. resolution 170 km/pix. New Horizons is 31.8 AU from Earth.
2015-07-07 00:13:22	New Horizons is taking images of Piddo with LORRI from 8704526.2 km away at est. resolution 43 km/pix. New Horizons is 51.5 AO from Earth.
2015-07-07 00:10:21	New Horizons is taking images of Hydra with LORRI from 8754016.7 km away at est. resolution 43 km/pix. New Horizons is 31.8 AU from Earth.
2015-07-07 00:27:49	
2015-07-07 00:27:49	New Horizons is taking images of Hydra with LORRI from 8750042.3 km away at est. resolution 43 km/pix.  New Horizons is taking images of Pluto with LORRI from 8697738.5 km away at est. resolution 43 km/pix. New Horizons is 31.8 AU from Earth.
2015-07-07 01:18:52	New Horizons is taking particle data with PEPSSI. New Horizons is 31.8 AU from Earth.
2015-07-07 02:55:00	New Horizons' track ending with Goldstone 70 m (DSS-14)
2015-07-07 05:30:00	New Horizons soon to be communicating with Canberra 70 m (DSS-43) http://eyes.nasa.gov/dsn/dsn.html
2015-07-07 07:59:58	New Horizons is taking particle data with PEPSSI. New Horizons is 31.8 AU from Earth.
2015-07-07 07:59:58	New Horizons is taking solar wind data with SWAP. New Horizons is 31.8 AU from Earth.
2015-07-07 08:00:00	New Horizons' Student Dust Counter sampling 8,327,938 km from Pluto.
2015-07-07 11:54:47	New Horizons is taking 4 images of Pluto with LORRI from 8133790.1 km away at est. resolution 40 km/pix. New Horizons is 31.8 AU from Earth.
2015-07-07 11:59:23	New Horizons is taking 8 spectra of Pluto with Alice from 8129986.7 km away. New Horizons is 31.8 AU from Earth.
2015-07-07 12:28:47	New Horizons is transitioning to the Encounter Sequence
2015-07-07 12:44:09	New Horizons is taking an image of Pluto with MVIC Color from 8092972.7 km away at est. resolution 160 km/pix. New Horizons is 31.8 AU from Earth.
2015-07-07 12:46:57	New Horizons is taking a spectrum of Pluto with LEISA from 8090657.6 km away at est. resolution 500 km/pix.
2015-07-07 13:05:01	New Horizons is taking solar wind data with SWAP. New Horizons is 31.8 AU from Earth.
2015-07-07 13:44:00	New Horizons is taking particle data with PEPSSI. New Horizons is 31.8 AU from Earth.
2015-07-07 15:54:58	New Horizons is entering Encounter Mode
2015-07-07 16:15:00	New Horizons' track ending with Canberra 70 m (DSS-43)
2015-07-07 16:30:00	New Horizons soon to be communicating with Madrid 34 m (DSS-55) http://eyes.nasa.gov/dsn/dsn.html
2015-07-07 18:24:49	New Horizons is taking 3 images of Pluto with LORRI from 7811348.3 km away at est. resolution 39 km/pix. New Horizons is 31.8 AU from Earth.
2015-07-07 18:29:11	New Horizons is taking 2 images of Nix with LORRI from 7795841.9 km away at est. resolution 39 km/pix.
2015-07-07 18:33:51	New Horizons is taking 2 images of Hydra with LORRI from 7850436.3 km away at est. resolution 39 km/pix. New Horizons is 31.8 AU from Earth.
2015-07-07 18:35:00	New Horizons soon to be communicating with Madrid 70 m (DSS-63) http://eyes.nasa.gov/dsn/dsn.html
2015-07-07 18:36:36	New Horizons is taking 2 images of Hydra with LORRI from 7848157.5 km away at est. resolution 39 km/pix.
2015-07-07 18:41:16	New Horizons is taking 2 images of Pluto with LORRI from 7797751.3 km away at est. resolution 39 km/pix. New Horizons is 31.8 AU from Earth.
2015-07-07 18:45:58	New Horizons is taking an image of Charon with LORRI from 7806730.4 km away at est. resolution 39 km/pix.
2015-07-07 18:45:00	New Horizons' track ending with Madrid 34 m (DSS-55)
2015-07-07 23:00:00	New Horizons' track ending with Madrid 70 m (DSS-63)
2015-07-07 23:40:00	New Horizons soon to be communicating with Goldstone 70 m (DSS-14) http://eyes.nasa.gov/dsn/dsn.html
2015-07-07 23:40:00	New Horizons soon to be communicating with Goldstone 34 m (DSS-15) http://eyes.nasa.gov/dsn/dsn.html
2015-07-07 23:40:00	New Horizons soon to be communicating with Goldstone 34 m (DSS-24) http://eyes.nasa.gov/dsn/dsn.html
2015-07-07 23:40:00	New Horizons soon to be communicating with Goldstone 34 m (DSS-25) http://eyes.nasa.gov/dsn/dsn.html
2015-07-07 23:40:00	New Horizons soon to be communicating with Goldstone 34 m (DSS-26) http://eyes.nasa.gov/dsn/dsn.html
2015-07-08 03:55:49	New Horizons is taking 3 images of Pluto with LORRI from 7339475.6 km away at est. resolution 36 km/pix. New Horizons is 31.8 AU from Earth.
2015-07-08 03:59:23	New Horizons is taking 12 spectra of Pluto with Alice from 7336528.6 km away. New Horizons is 31.8 AU from Earth.
2015-07-08 05:04:09	New Horizons is taking an image of Pluto with MVIC Color from 7283017.0 km away at est. resolution 140 km/pix. New Horizons is 31.8 AU from Earth.
2015-07-08 05:06:50	New Horizons is taking a spectrum of Pluto with LEISA from 7280800.0 km away at est. resolution 450 km/pix.
2015-07-08 07:50:00	New Horizons' track ending with Goldstone 70 m (DSS-14)
2015-07-08 07:50:00	New Horizons' track ending with Goldstone 34 m (DSS-15)
2015-07-08 07:50:00	New Horizons' track ending with Goldstone 34 m (DSS-24)
2015-07-08 07:50:00	New Horizons' track ending with Goldstone 34 m (DSS-25)
2015-07-08 07:50:00	New Horizons' track ending with Goldstone 34 m (DSS-26)
2015-07-08 08:00:00	New Horizons' Student Dust Counter sampling 7,137,735 km from Pluto.
2015-07-08 08:45:00	New Horizons soon to be communicating with Canberra 70 m (DSS-43) http://eyes.nasa.gov/dsn/dsn.html
2015-07-08 08:50:00	New Horizons soon to be communicating with Canberra 34 m (DSS-34) http://eyes.nasa.gov/dsn/dsn.html
2015-07-08 09:50:00	New Horizons' track ending with Canberra 34 m (DSS-34)
2015-07-08 11:57:49	New Horizons is taking 3 images of Pluto with LORRI from 6941277.7 km away at est. resolution 34 km/pix. New Horizons is 31.8 AU from Earth.
2015-07-08 12:01:23	New Horizons is taking 12 spectra of Pluto with Alice from 6938331.4 km away. New Horizons is 31.8 AU from Earth.

2015-07-08 13:06:14	New Horizons is taking an image of Pluto with MVIC Color from 6884762.7 km away at est. resolution 140 km/pix. New Horizons is 31.8 AU from Earth.
2015-07-08 13:08:54	New Horizons is taking a spectrum of Pluto with LEISA from 6882560.0 km away at est. resolution 430 km/pix.
2015-07-08 13:47:27	New Horizons is taking radio uplink data with REX. New Horizons is 31.8 AU from Earth.
2015-07-08 13:47:42	New Horizons is taking radio uplink data with REX. New Horizons is 31.8 AU from Earth.
2015-07-08 16:15:00	New Horizons' track ending with Canberra 70 m (DSS-43)
2015-07-08 16:25:00	New Horizons soon to be communicating with Madrid 34 m (DSS-55) http://eyes.nasa.gov/dsn/dsn.html
2015-07-08 18:15:00	New Horizons' track ending with Madrid 34 m (DSS-55)
2015-07-08 18:25:00	New Horizons soon to be communicating with Madrid 70 m (DSS-63) http://eyes.nasa.gov/dsn/dsn.html
2015-07-08 18:35:49	New Horizons is taking 3 images of Pluto with LORRI from 6612527.8 km away at est. resolution 33 km/pix. New Horizons is 31.8 AU from Earth.
2015-07-08 22:47:53	New Horizons is taking 10 spectra of Pluto with Alice from 6404329.7 km away. New Horizons is 31.8 AU from Earth.
2015-07-08 23:35:00	New Horizons soon to be communicating with Goldstone 70 m (DSS-14) http://eyes.nasa.gov/dsn/dsn.html
2015-07-08 23:40:28	New Horizons is taking an image of Pluto with MVIC Color from 6360897.8 km away at est. resolution 130 km/pix. New Horizons is 31.8 AU from Earth.  New Horizons is taking a spectrum of Pluto with LEISA from 6359025.7 km away at est. resolution 390 km/pix.
2015-07-08 23:42:44	New Horizons' track ending with Madrid 70 m (DSS-63)
2015-07-09 00:01:57	New Horizons is taking 4 images of Pluto with LORRI from 6343153.4 km away at est. resolution 31 km/pix. New Horizons is 31.8 AU from Earth.
2015-07-09 00:06:21	New Horizons is taking 2 images of Nix with LORRI from 6316553.1 km away at est. resolution 31 km/pix.
2015-07-09 00:11:01	New Horizons is taking 2 images of Hydra with LORRI from 6376845.3 km away at est. resolution 32 km/pix. New Horizons is 31.8 AU from Earth.
2015-07-09 00:13:47	New Horizons is taking 2 images of Hydra with LORRI from 6374549.9 km away at est. resolution 32 km/pix.
2015-07-09 00:18:26	New Horizons is taking 2 images of Pluto with LORRI from 6329538.7 km away at est. resolution 31 km/pix. New Horizons is 31.8 AU from Earth.
2015-07-09 00:23:08	New Horizons is taking an image of Charon with LORRI from 6324255.1 km away at est. resolution 31 km/pix.
2015-07-09 02:50:00	New Horizons soon to be communicating with Goldstone 34 m (DSS-15) http://eyes.nasa.gov/dsn/dsn.html
2015-07-09 03:00:00	New Horizons' track ending with Goldstone 70 m (DSS-14)
2015-07-09 04:55:00	New Horizons soon to be communicating with Canberra 70 m (DSS-43) http://eyes.nasa.gov/dsn/dsn.html
2015-07-09 05:05:00	New Horizons' track ending with Goldstone 34 m (DSS-15)
2015-07-09 08:00:00	New Horizons' Student Dust Counter sampling 5,948,284 km from Pluto.
2015-07-09 11:46:47	New Horizons is taking 4 images of Pluto with LORRI from 5760942.4 km away at est. resolution 29 km/pix. New Horizons is 31.8 AU from Earth.
2015-07-09 11:50:23	New Horizons is taking 12 spectra of Pluto with Alice from 5757968.3 km away. New Horizons is 31.8 AU from Earth.
2015-07-09 12:55:29	New Horizons is taking an image of Pluto with MVIC Color from 5704186.6 km away at est, resolution 110 km/pix. New Horizons is 31.8 AU from Earth.
2015-07-09 12:58:09 2015-07-09 16:10:00	New Horizons is taking a spectrum of Pluto with LEISA from 5701983.5 km away at est. resolution 350 km/pix.  New Horizons' track ending with Canberra 70 m (DSS-43)
2015-07-09 16:10:00	New Horizons soon to be communicating with Madrid 70 m (DSS-63) http://eyes.nasa.gov/dsn/dsn.html
2015-07-09 18:15:47	New Horizons is taking 4 images of Pluto with LORRI from 5439546.1 km away at est. resolution 27 km/pix. New Horizons is 31.8 AU from Earth.
2015-07-09 18:20:11	New Horizons is taking 2 images of Nix with LORRI from 5407153.3 km away at est. resolution 27 km/pix.
2015-07-09 18:24:51	New Horizons is taking 2 images of Hydra with LORRI from 5469036.3 km away at est. resolution 27 km/pix. New Horizons is 31.8 AU from Earth.
2015-07-09 18:27:37	New Horizons is taking 2 images of Hydra with LORRI from 5466739.4 km away at est. resolution 27 km/pix.
2015-07-09 18:32:16	New Horizons is taking 2 images of Pluto with LORRI from 5425925.7 km away at est. resolution 27 km/pix. New Horizons is 31.8 AU from Earth.
2015-07-09 18:36:58	New Horizons is taking an image of Charon with LORRI from 5411329.7 km away at est. resolution 27 km/pix.
2015-07-09 22:55:00	New Horizons' track ending with Madrid 70 m (DSS-63)
2015-07-09 23:30:00	New Horizons soon to be communicating with Goldstone 70 m (DSS-14) http://eyes.nasa.gov/dsn/dsn.html
2015-07-09 23:30:00	New Horizons soon to be communicating with Goldstone 34 m (DSS-15) http://eyes.nasa.gov/dsn/dsn.html
2015-07-09 23:30:00	New Horizons soon to be communicating with Goldstone 34 m (DSS-24) http://eyes.nasa.gov/dsn/dsn.html
2015-07-09 23:30:00	New Horizons soon to be communicating with Goldstone 34 m (DSS-25) http://eyes.nasa.gov/dsn/dsn.html
2015-07-09 23:30:00	New Horizons soon to be communicating with Goldstone 34 m (DSS-26) http://eyes.nasa.gov/dsn/dsn.html
2015-07-10 03:47:28	New Horizons is taking 6 images of Pluto with LORRI from 4967064.0 km away at est. resolution 25 km/pix. New Horizons is 31.8 AU from Earth.
2015-07-10 03:48:43 2015-07-10 03:52:23	New Horizons is taking 6 images of Pluto with LORRI from 4966030.7 km away at est. resolution 25 km/pix.  New Horizons is taking 12 spectra of Pluto with Alice from 4962999.6 km away. New Horizons is 31.8 AU from Earth.
2015-07-10 03:52:23	New Horizons is taking an image of Pluto with MVIC Color from 4911332.0 km away at est. resolution 97 km/pix.
2015-07-10 04:57:34	New Horizons is taking a spectrum of Pluto with LEISA from 4909113.7 km away at est. resolution 300 km/pix. New Horizons is 31.8 AU from Earth.
2015-07-10 07:40:00	New Horizons' track ending with Goldstone 70 m (DSS-14)
2015-07-10 07:40:00	New Horizons' track ending with Goldstone 34 m (DSS-15)
2015-07-10 07:40:00	New Horizons' track ending with Goldstone 34 m (DSS-24)
2015-07-10 07:40:00	New Horizons' track ending with Goldstone 34 m (DSS-25)
2015-07-10 07:40:00	New Horizons' track ending with Goldstone 34 m (DSS-26)
2015-07-10 08:00:00	New Horizons' Student Dust Counter sampling 4,758,283 km from Pluto.
2015-07-10 09:00:00	New Horizons soon to be communicating with Canberra 70 m (DSS-43) http://eyes.nasa.gov/dsn/dsn.html
2015-07-10 09:05:00	New Horizons soon to be communicating with Canberra 34 m (DSS-34) http://eyes.nasa.gov/dsn/dsn.html
2015-07-10 10:05:00	New Horizons' track ending with Canberra 34 m (DSS-34)
2015-07-10 11:49:47	New Horizons is taking 4 images of Pluto with LORRI from 4568271.9 km away at est. resolution 23 km/pix.
2015-07-10 11:53:23	New Horizons is taking 11 spectra of Pluto with Alice from 4565294.7 km away. New Horizons is 31.8 AU from Earth.
2015-07-10 12:51:38	New Horizons is taking an image of Pluto with MVIC Color from 4517120.6 km away at est, resolution 89 km/pix.
2015-07-10 12:54:28	New Horizons is taking an image of Pluto with MVIC Color from 4514777.3 km away at est. resolution 89 km/pix. New Horizons is 31.8 AU from Earth.  New Horizons is taking a spectrum of Pluto with LEISA from 4512144.6 km away at est. resolution 280 km/pix.
2015-07-10 12:37:39	New Horizons is taking a spectrum of Pluto with LEISA from 4496844.1 km away at est. resolution 280 km/pix. New Horizons is 31.8 AU from Earth.
2015-07-10 13:16:09	New Horizons is taking a spectrum or Fluto with LEISA from 4490644. I kin away at est, resolution 260 kin/pix, New Horizons is \$1.6 AO from Earth.  New Horizons is taking 8 images with LORRI 4x4. New Horizons is \$1.8 AU from Earth.
2015-07-10 13:37:04	New Horizons is taking 8 images with LORRI 4x4. New Horizons is 31.8 AU from Earth.
	New Horizons is taking 8 images with LORRI 4x4. New Horizons is 31.8 AU from Earth.
2015-07-10 13:39:14	New Horizons is taking o images with border 4x4. New Horizons is 51.0 Ao from barti.
2015-07-10 13:39:14 2015-07-10 13:41:24	New Horizons is taking 8 images with LORRI 4x4. New Horizons is 31.8 AU from Earth.

2015-07-13 16:14:07	New Horizons is taking 4 images of Pluto with LORRI from 773923.02 km away at est. resolution 3.8 km/pix. New Horizons is 31.8 AU from Earth.
2015-07-13 16:17:28	New Horizons is taking an image of Pluto with LORRI from 771152.82 km away at est. resolution 3.8 km/pix.
2015-07-13 16:35:14	New Horizons is taking radio uplink data with REX. New Horizons is 31.8 AU from Earth.
2015-07-13 16:35:29	New Horizons is taking radio uplink data with REX. New Horizons is 31.8 AU from Earth.
2015-07-13 16:56:21	New Horizons is taking 2 images of Pluto with LORRI from 739000.04 km away at est. resolution 3.7 km/pix. New Horizons is 31.8 AU from Earth.
2015-07-13 16:57:39	New Horizons is taking 2 images of Pluto with LORRI from 737925.10 km away at est. resolution 3.7 km/pix. New Horizons is 5.1.6 AO from Earth.
2015-07-13 16:58:57	New Horizons is taking 2 images of Pluto with LORRI from 736850.15 km away at est. resolution 3.7 km/pix. New Horizons is 31.8 AU from Earth.
2015-07-13 17:00:15	New Horizons is taking 2 images of Pluto with LORRI from 735775.20 km away at est. resolution 3.6 km/pix.
2015-07-13 17:02:22	New Horizons is taking 4 images of Charon with LORRI from 748600.26 km away at est. resolution 3.7 km/pix. New Horizons is 31.8 AU from Earth.
2015-07-13 17:07:43	New Horizons is taking an image of Pluto with MVIC Color from 729601.20 km away at est. resolution 14 km/pix.
2015-07-13 17:11:03	New Horizons is taking a spectrum of Pluto with LEISA from 726844.96 km away at est. resolution 45 km/pix. New Horizons is 31.8 AU from Earth.
2015-07-13 19:10:33	New Horizons is taking 2 images of Pluto with LORRI from 628042.05 km away at est. resolution 3.1 km/pix.
2015-07-13 19:11:31	New Horizons is taking 2 images of Pluto with LORRI from 627242.88 km away at est. resolution 3.1 km/pix. New Horizons is 31.8 AU from Earth.
2015-07-13 19:12:29	New Horizons is taking 2 images of Pluto with LORRI from 626443.71 km away at est. resolution 3.1 km/pix.
2015-07-13 19:13:27	New Horizons is taking 2 images of Pluto with LORRI from 625644.53 km away at est. resolution 3.1 km/pix. New Horizons is 31.8 AU from Earth.
2015-07-13 19:16:11	New Horizons is taking 2 images of Hydra with LORRI from 641583.58 km away at est. resolution 3.2 km/pix.
2015-07-13 19:19:16	New Horizons is taking 2 images of Nix with LORRI from 589277.52 km away at est. resolution 2.9 km/pix. New Horizons is 31.8 AU from Earth.
2015-07-13 19:25:03	New Horizons is taking 2 spectra of Pluto with Alice from 616054.56 km away. New Horizons is 31.8 AU from Earth.
2015-07-13 19:38:06	New Horizons is taking 2 images of Kerberos with LORRI from NaN km away.
2015-07-13 19:39:06	New Horizons is taking 2 images of Kerberos with LORRI from NaN km away. New Horizons is 31.8 AU from Earth.
2015-07-13 19:40:06	New Horizons is taking 2 images of Kerberos with LORRI from NaN km away.
2015-07-13 19:43:46	New Horizons is taking 2 images of Styx with LORRI from NaN km away. New Horizons is 31.8 AU from Earth.
2015-07-13 19:44:46	New Horizons is taking 2 images of Styx with LORRI from NaN km away. New Horizons is 31.8 AU from Earth.
2015-07-13 19:45:46	New Horizons is taking 2 images of Styx with LORRI from NaN km away. New Horizons is 31.8 AU from Earth.
2015-07-13 19:50:00	12 hours to #PlutoFlyby Closest Approach. New Horizons is 595,428 km from Pluto!
2015-07-13 19:53:45	New Horizons is taking an image of Kerberos with MVIC Color from NaN km away. New Horizons is 31.8 AU from Earth.
2015-07-13 20:00:09	New Horizons is taking 20 images of Pluto with MVIC from 587037.65 km away at est, resolution 12 km/pix.
2015-07-13 20:04:59	New Horizons is taking 20 images of Pluto with MVIC from 583042.10 km away at est, resolution 12 km/pix.
2015-07-13 20:08:59	New Horizons is taking 2 spectra of Pluto with Alice from 579735.46 km away. New Horizons is 31.8 AU from Earth.
2015-07-13 20:23:39	New Horizons is taking 20 images of Pluto with MVIC from 567611.30 km away at est. resolution 11 km/pix.
2015-07-13 20:28:29	New Horizons is taking 20 images of Pluto with MVIC from 563615.91 km away at est. resolution 11 km/pix.
2015-07-13 20:33:17	New Horizons is taking 4 images of Pluto with LORRI from 559648.10 km away at est. resolution 2.8 km/pix.
2015-07-13 20:39:02	New Horizons is taking 14 spectra of Pluto with Alice from 554895.04 km away. New Horizons is 31.8 AU from Earth.
2015-07-13 20:50:00	11 hours to #PlutoFlyby Closest Approach. New Horizons is 545,829 km from Pluto!
2015-07-13 20:55:00	New Horizons soon to be communicating with Madrid 34 m (DSS-55) http://eyes.nasa.gov/dsn/dsn.html

2015-07-14 07:30:00	20 minutes to #PlutoFlyby Closest Approach. New Horizons is 21,536 km from Pluto!
2015-07-14 07:31:05	New Horizons is taking an image of Pluto with MVIC from 20854.035 km away at est. resolution 0.41 km/pix. New Horizons is 31.8 AU from Earth.
2015-07-14 07:40:00	10 minutes to #PlutoFlyby Closest Approach. New Horizons is 16,054 km from Pluto!
2015-07-14 07:40:57	New Horizons is taking a spectrum of Pluto with Alice from 15661.488 km away. New Horizons is 31.8 AU from Earth.
2015-07-14 07:43:07	New Horizons is taking 67 images of Charon with LORRI from 34200.236 km away at est. resolution 0.17 km/pix.
2015-07-14 07:45:29	New Horizons is taking an image of Charon with MVIC from 33245.206 km away at est. resolution 0.66 km/pix. New Horizons is 31.8 AU from Earth.
2015-07-14 07:50:47	New Horizons is taking an image of Pluto with MVIC from 13735.372 km away at est. resolution 0.27 km/pix. New Horizons is 31.8 AU from Earth.
2015-07-14 07:50:00	Closest Approach to Pluto #PlutoFlyBy Go #NASANewHorizons!
2015-07-14 07:53:19	New Horizons is taking radio reflectance data of Pluto with REX from 13981.327 km away. New Horizons is 31.8 AU from Earth.
2015-07-14 07:53:34	New Horizons is taking radio reflectance data of Pluto with REX from 14022.327 km away. New Horizons is 31.8 AU from Earth.
2015-07-14 07:57:15	New Horizons is taking radio reflectance data of Pluto with REX from 14947.896 km away. New Horizons is 31.8 AU from Earth.
2015-07-14 07:57:30	New Horizons is taking radio reflectance data of Pluto with REX from 15031.013 km away. New Horizons is 31.8 AU from Earth.
2015-07-14 07:58:17	New Horizons is taking a spectrum of Pluto with Alice from 15306.595 km away. New Horizons is 31.8 AU from Earth.
2015-07-14 07:58:30	New Horizons is taking 60 images of Pluto with LORRI from 15386.759 km away at est. resolution 0.076 km/pix.
2015-07-14 07:38:30	
	New Horizons is taking an image of Pluto with MVIC from 16282.704 km away at est. resolution 0.32 km/pix. New Horizons is 31.8 AU from Earth.
2015-07-14 08:00:00	New Horizons' Student Dust Counter sampling 15,986 km from Pluto.
2015-07-14 08:08:13	New Horizons is taking an image of Pluto with MVIC from 20323.226 km away at est. resolution 0.40 km/pix.
2015-07-14 08:14:16	New Horizons Beginning Pluto Occultation Measurements #PlutoFlyBy
2015-07-14 08:14:16	New Horizons is taking a spectrum of Pluto with Alice from 24247.777 km away. New Horizons is 31.9 AU from Earth.
2015-07-14 08:15:30	New Horizons is taking radio reflectance data of Pluto with REX from 25094.810 km away. New Horizons is 31.9 AU from Earth.
2015-07-14 08:22:18	New Horizons is taking radio reflectance data of Pluto with REX from 29958.281 km away. New Horizons is 31.9 AU from Earth.
2015-07-14 08:52:03	New Horizons is taking a spectrum of Pluto with Alice from 53024.244 km away. New Horizons is 31.9 AU from Earth.
2015-07-14 09:28:02	New Horizons is taking radio uplink data with REX. New Horizons is 31.9 AU from Earth.
2015-07-14 09:28:17	New Horizons is taking radio uplink data with REX. New Horizons is 31.9 AU from Earth.
2015-07-14 09:32:51	New Horizons is taking 30 spectra of Charon with Alice from 79643.484 km away. New Horizons is 31.9 AU from Earth.
2015-07-14 09:45:44	New Horizons is taking radio reflectance data of Charon with REX from 89695.510 km away. New Horizons is 31.9 AU from Earth.
2015-07-14 09:45:44	New Horizons Beginning Charon Occultation Measurements #PlutoFlyBy
2015-07-14 09:48:10	New Horizons is taking a spectrum of Charon with Alice from 91611.317 km away. New Horizons is 31.9 AU from Earth.
2015-07-14 09:52:32	New Horizons is taking radio reflectance data of Charon with REX from 95060.780 km away. New Horizons is 31.9 AU from Earth.
2015-07-14 10:44:55	New Horizons is taking 4 images of Hydra with LORRI from 156723.64 km away at est. resolution 0.78 km/pix. New Horizons is 31.9 AU from Earth.
2015-07-14 10:45:45	New Horizons is taking 4 images of Hydra with LORRI from 157326.38 km away at est. resolution 0.78 km/pix.
2015-07-14 10:46:35	New Horizons is taking 4 images of Hydra with LORRI from 157929.86 km away at est. resolution 0.78 km/pix. New Horizons is 31.9 AU from Earth.
2015-07-14 10:47:25	New Horizons is taking 4 images of Hydra with LORRI from 158534.08 km away at est. resolution 0.79 km/pix.
2015-07-14 10:48:15	New Horizons is taking 4 images of Hydra with LORRI from 159139.03 km away at est. resolution 0.79 km/pix. New Horizons is 31.9 AU from Earth.
2015-07-14 10:49:05	
	New Horizons is taking 4 images of Hydra with LORRI from 159744.70 km away at est. resolution 0.79 km/pix.
2015-07-14 10:49:55	New Horizons is taking 4 images of Hydra with LORRI from 160351.08 km away at est. resolution 0.80 km/pix. New Horizons is 31.9 AU from Earth.
2015-07-14 10:50:45	New Horizons is taking 4 images of Hydra with LORRI from 160958.17 km away at est. resolution 0.80 km/pix.
2015-07-14 10:50:00	New Horizons soon to be communicating with Canberra 34 m (DSS-34) http://eyes.nasa.gov/dsn/dsn.html
2015-07-14 10:51:35	New Horizons is taking 4 images of Hydra with LORRI from 161565.95 km away at est. resolution 0.80 km/pix. New Horizons is 31.9 AU from Earth.
2015-07-14 10:52:25	New Horizons is taking 4 images of Hydra with LORRI from 162174.42 km away at est. resolution 0.80 km/pix.
2015-07-14 10:55:27	New Horizons is taking 4 images of Nix with LORRI from 184363.28 km away at est. resolution 0.91 km/pix. New Horizons is 31.9 AU from Earth.
2015-07-14 10:55:00	New Horizons soon to be communicating with Canberra 70 m (DSS-43) http://eyes.nasa.gov/dsn/dsn.html
2015-07-14 10:56:17	New Horizons is taking 4 images of Nix with LORRI from 185044.97 km away at est. resolution 0.92 km/pix.
2015-07-14 10:57:07	New Horizons is taking 4 images of Nix with LORRI from 185726.69 km away at est. resolution 0.92 km/pix. New Horizons is 31.9 AU from Earth.
2015-07-14 10:57:57	New Horizons is taking 4 images of Nix with LORRI from 186408.45 km away at est. resolution 0.92 km/pix.
2015-07-14 11:00:28	New Horizons is taking an image of Nix with MVIC Color from 188467.58 km away at est. resolution 3.7 km/pix. New Horizons is 31.9 AU from Earth.
2015-07-14 11:04:08	New Horizons is taking 4 images of Pluto with LORRI from 160954.31 km away at est. resolution 0.80 km/pix.
2015-07-14 11:05:01	New Horizons is taking 4 images of Pluto with LORRI from 161681.58 km away at est. resolution 0.80 km/plx. New Horizons is 31.9 AU from Earth.
	New Horizons is taking 4 images of Pluto with LORRI from 162408.88 km away at est. resolution 0.81 km/pix.
